

JARDIM VISTA

GARDEN GENIUS

Richard Westcott is Jardim Vista!

We bump into him all the time when we are visiting properties in and around Quinta do Lago. He's like a Bizzy Lizzy - he just never stops! Richard is the founder and 'soul' of the company and produces the most spectacular gardens – not only here, his reputation has spread and he now also has clients in the USA, Middle East and the rest of Iberia.

We see plenty of beautiful gardens in our line of work, but Jardim Vista certainly has the edge. From a sales point of view, where outdoor living is so important, his gardens are the crowning glory of many a property. His gardens have a certain style; they fit into the Algarvean landscape beautifully, but add an immense amount of elegance and style. If you are considering landscaping your property take a look at their work and see if you agree that they have that "je ne sais quoi!".

The Jardim Vista Landscape Centre and headquarters near Quinta do Lago, provide clients with a source of inspiration by showcasing a wide variety of plant species, materials and landscape features that can be incorporated into any design. Trees, palms and other mature stock can also be viewed and selected.

The design studio is based there, and the creative team is available to give advice and consultation on design, construction and maintenance.
